

I benefit from listening to XM Satellite Radio and its traffic and weather channels. Satellite radio provides variety and quality that are not available elsewhere. I put on a lot of miles in rural areas, areas not covered by the NAB. I would like to know what the weather is like in the cities I am headed to. I pay for these services and it should not be up to the National Association of Broadcasters to dictate what I am permitted to hear. I urge you, the FCC, to reject the NAB's petition 04-160 and to support XM's ability to provide the kind of programming that I demand and deserve.

Thank you
